

ScanPro i9300

Find Your Blip With Exceptional Accuracy.

The ScanPro® i9300 microfilm scanner is the product you've been waiting for to bring your image-marked, or blipped, film into the digital age. We know that original blipped film scanners are aging and you have limited options for repairing them. That's where the i9300 comes in — **designed to recognize all of your blipped film, regardless of whether it is standard or custom format.**

Utilizing proprietary technology, the ScanPro i9300 finds your blip the first time with exceptionally accurate searching. The machine's precision is bolstered by its unique **PRECISION-Guide film rollers, which tightly control the microfilm's movement, ensuring the most precise image search.**

In addition, the ScanPro i9300 **is a universal scanner that can read and scan ALL microfilm types** — not just blipped. This one machine allows you to utilize your entire microfilm collection.

THE SCANPRO i9300 OFFERS YOU:

- The ability to work with and provide automated set-up for both standard and custom blipped formats
- Works with ALL other microform types in addition to blipped film
- Exceptionally accurate searching
- Easy, simple and fast film loading
- FOCUS-Lock™ maintains image focus throughout optical zoom
- SPOT-Edit™ live image editing of selected texts and pictures while all other areas remain unchanged
- AUTO-Adjust automatic on-screen image straightening, cropping and brightness and contrast adjustment
- Optical Character Recognition (OCR) using the latest ABBYY® Fine Reader software
- Built on the reliable ScanPro® 3000 platform

If you have image-marked
film, this is the solution you
have been waiting for.

Precise. Powerful. Universal.

ScanPro

UNIVERSAL

We like to think that the i9300 is the future of blipped film. Whether you have Kodak, Canon, Minolta, 3M or custom-formatted film, the i9300's automated set-up makes it easy to recognize them all. Not only that, but the ScanPro i9300 can read and scan regular microfilm! So whatever your microform collection contains, the i9300 has you covered.

REMARKABLY ACCURATE

The ScanPro i9300 offers the most precise image search on the market. Using proprietary technology, it recognizes every batch, file and page with incomparable accuracy. Standard features on the i9300 further enhance your work. FOCUS-Lock technology ensures that your film image maintains focus throughout the optical zoom. SPOT-Edit allows live image editing of selected text and pictures while all other areas remain unchanged. The AUTO-Adjust tool automatically straightens and crops the on-screen image and properly adjusts for brightness and contrast, making your image clear and easier to work with. Some patrons have referred to this as the "magic button," but we assure you, no magic is required.

COMPACT AND DURABLE

The ScanPro i9300 is designed and built to stand up to the rigors of public use, and its compact size means it will fit in almost any workspace. The i9300 software gives users the ability to search for blips using a convenient and intuitive on-screen window, unlike old machines with a bulky stand-alone keypad controller. It's also LibraryQuiet™, so it won't disturb research. All ScanPro products have a proven track record of performance and reliability backed by factory-trained and certified dealers. In addition, we pride ourselves on our customer service — we update and train our customers as new features and software updates become available.

ULTRA-HIGH DEFINITION SCANNING

The ScanPro i9300 is built on the ScanPro® 3000 platform. This exceptional, fully-featured unit gives you the benefit of its 26 megapixel camera, which is nearly twice the optical resolution of any other microfilm scanner on the market. The ultra-high definition scanning of the ScanPro 3000 offers the clearest images in the industry.

Since the i9300 is built on the ScanPro 3000 platform, you also can add AUTO-Scan® Pro — fast, accurate and customizable automatic scanning — and the PowerScan Productivity Suite (PPS), the fastest word searchable OCR software in the industry.

i9300

Clearest Image. Highest Zoom. **Fastest OCR Software.**

OCR work on the ScanPro is a SNAP!

Take your research and your ScanPro i9300 to the next level with our exceptional PowerScan Productivity Suite (PPS) OCR software. The PPS software has been leading the marketplace as the fastest word searchable OCR software in the micrographics industry since 2011. Now, we've taken it a step further by adding proprietary high speed processing algorithms — **Smart Navigation Active Processing (SNAP)** — to give you real-time OCR results. Get information in as little as ONE second.

PPS software with SNAP gives you ease-of-use and efficiency that's never before been seen in the micrographics industry.

Our software gives you the following capabilities, all using a live-screen image. There's no need to save your microfilm image first!

INFO-Link™ To access more information about a topic within your microfilm image, just click the INFO-Link button and the desired word to open a reference source like Wikipedia, a dictionary, or a thesaurus.

Copy to Clipboard Select information on your microfilm image and copy it to the clipboard as text for pasting into any document.

WORD-Search™ Click the WORD-Search button and enter a word in the search box to find that word in your microfilm image. Every instance of the word is highlighted.

Multi-Page Word-Searchable PDF Convert any microfilm image to a single-page or multi-page word-searchable PDF with just one click.

See the ScanPro with PPS Difference!

OCR Feature	PowerScan Productivity Suite software with SNAP from e-ImageData	Competitor Software
INFO-Link (source used Wikipedia)	1 second	67 seconds
WORD-Search	2 seconds	71 seconds (with 20% accuracy in finding selected word)
Copy-to-Clipboard	1 second	57 seconds
Multi-Page Word Searchable PDF (10 pages)	17.4 seconds (1.74 seconds per page)	209 seconds (20.9 seconds per page)

ScanPro i9300

ScanPro i9300 Features and Specifications

USB3.0 Camera: 26 megapixel, ultra high resolution, pixel-shifting camera
Reading blips: One, two and three level (highest accuracy), all common sizes and custom sizes. Simplex and Duplex film formats with auto capture and custom search
Interface: Intuitive, simple, easy to use with all brands of blipped film
Camera optical image orientation portrait and landscape plus 120°
Maximum image size: 424 megapixels (image size is not optical resolution)
Optical zoom 7 to 105x magnification across the entire range. The highest in the industry
Digital zoom magnification: 7 to 1575x
Fit to Window fills the entire monitor screen leaving no blank area
On-screen magnifier (selectable zoom) to read small text and examine fine details. Scan and print what is seen in the magnifier
Continual image focus (Focus Lock) even during optical zoom
Soft, bright, film-optimized, monochromatic LEDs with lifetime warranty and optically clear carrier glass for best image quality
Fiche/Aperture Card Carrier
(optional)16/35 universal and 16/35/M cartridge universal carriers
Media: Ultra-fiche (reduction ≥ 90X), micro opaques (optional)
PRECISION-Guide film rollers: Low inertia, easy-to-thread, ball bearing rollers provide precision control of film image position and movement
PowerScan Productivity Suite (optional)
Customizable Film Selection Wizard One-click to automatically set up your scanner
Presets retain all settings including optical zoom and focus
Single page OCR PDF using ABBYY fine reader
Specify the printed document dimensions
Specify the scanned document dimensions
One-click print buttons: Print to up to three printers (located nearly anywhere); print to paper trays to select paper sizes, print to plotters, specify where on the paper to print or center, turn on/off watermark and copyright warnings
One-click scan buttons: Scan to e-mail (direct within the ScanPro software), hard drive, CD, Cloud
Previous/Next: Automatically moves the film one image for each click
SPOT- Edit™ (live editing provides speed and accuracy): Select any area (or multiple areas) then adjust brightness, contrast, redact or whiteout for any selection
One-click AUTO-Adjust button: Adjusts brightness, contrast, straightens, and crops
Optical straighten: Select Automatic, Line or Manual
Digital Rotation: Click to rotate image 90°, Click to mirror image
MergeClips™: Combine, arrange, and size scans to a single page, plus annotation
USB3/USB2/USB1: Convenient, front access port for portable flash drives
Automatic-Scanning (Included)
Auto Straighten, Crop, Resize and OCR as you scan
Unlimited scans, up to 10 pages per minute
AUTO-Scan Pro (optional)
Auto Straighten, Crop, Resize, and OCR as you scan
Auto Brightness & Contrast
Unlimited scans, up to 55 pages per minute

1 Optical Image Resolution @ Newspaper Mag.

ScanPro i9300 Product Information

Fits almost anywhere	Smallest operating footprint
Operating Systems	Win 7 to Win 10 (32 and 64 bit)
Dimensions (H x W x L)	18cm x 31cm x 41cm/7in x 12in x 16in
Weight/ Power	9kg (19.5lbs)/ 100-240VAC 50/60Hz
Film Path	Straight (film not pulled across glass edges)
Energy Efficiency	ENERGY STAR® Certified
Product Safety	OSHA workplace safety certified to US/CA standards
Scanner & RF Carrier	3-year factory warranty

Patents 8,269,890 8,537,279 9,179,019 9,197,766 9,158,983

PRECISION-Guide film rollers:

With a unique three-roller design, the PRECISION-Guide film rollers tightly control the microfilm's side-to-side movement, ensuring the most precise film control while searching for your image.

Customer Favorites!

SPOT-EDIT:

The must-have feature for working with microfilm that allows you to edit **ONLY** the part of the image you want to!

AUTO-ADJUST:

Our customers refer to this as the "magic button" because it automatically adjusts the contrast and brightness of your image, while straightening and cropping it on your screen.

CUSTOMER SERVICE:

While it may not be a listed feature, our customers love the proven track record of our machines. Their reliability is backed by our factory-trained and certified dealers. We will be here for you!
