# FULL FEATURED AP AUTOMATION

Our AP Automation software utilizes state-of-the-art Machine Learning technology to process invoices with incredible accuracy without all of the setup & configuration required by most other systems.

- **Invoice Import**

Invoices can be brought in directly from folders, email boxes, SFTP servers and more.

- **Automated Invoice Detection**

Invoices are automatically detected and split from the incoming document(s).

- **Intelligent Data Extraction**

There is no special configuration, no templates, or any zonal configuration needed to process invoices.

- **Enhanced Vendor Matching**

Vendors identified on invoices are matched to a master vendor file.

- **Complete PO Validation**

PO data can be validated against the standard invoice data such as Vendor, PO Number and Amount.

- **Payment Approval**

Payment approval workflows can be configured to be as simple or complex as needed.

- **Automated Export**

When the invoice is ready to be paid, our software can automatically format and export the invoice data.
